Inmarsat Global Xpress Enterprise / Government Land Terms and Conditions

- 1.) A one-time Subscription Activation charge applies to each Subscription when it is first provisioned on the Inmarsat Network. See "Miscellaneous Charges" for activation charges and other fees. Please see "Terminal Groups" for the antenna size associated with a terminal group. 2.) All Prices reflect a 12-month minimum commitment. For price adjustments for shorter and longer minimum-commitment timeframes, please see "Term Commitment Grace Period / Fee Adjustments".
- 3.) For commitment purposes, the activation month will count as a full month towards the commitment. If the terminal is disconnected early, an early termination charge will apply. The early termination charge will be the full, outstanding, commitment period. For clarity, if a terminal is activated on January 28th, 2015 on a plan with a 12-month commitment, the terminal will be committed through December 31st, 2015. January 2015 will count as a full month towards the commitment.
- 4.) Monthly fees will be charged in advance, aside from the initial monthly fee, which will be charged in arrears. Initial monthly fee is pro-rated based upon the number of days active. Global Xpress plans are available on a global or regional basis (defined in "Geographic Regions" section). 5.) Inmarsat Global Xpress plans may be withdrawn (i.e., discontinued) with a closure date. New activations on the discontinued plan will no longer be available after official closure date. Existing terminals on the withdrawn plan may remain on the plan for the remainder of their minimum- commitment period. Once the minimum-commitment period has elapsed, the satellite terminal must be moved to a new plan.
- 6.) Moving to a package that has a lower monthly fee will be considered a downgrade. Moving to a package that has a greater monthly fee will be considered an upgrade. Note that upgrades and downgrades are identified based upon the Subscription Fee for the same base-term commitment. The move to the same base plan with a lower minimum-commitment period will not be allowed. To clarify, moving from a Bronze 1 - 95% - 3-year commitment to a Bronze 1 - 95% - 6-month commitment will not be allowed.
- 7.) The new monthly Subscription Charge for an upgrade or downgrade will be applied based upon the date of the change (UTC). For clarity, an upgrade processed at 5 PM Eastern on February 21st will be counted as if it has been made at 00:00 UTC February 21st. A new minimum-commitment period will be applied from the date of upgrade.
- 8.) Downgrades will generate a one-time charge, which equals the dollar amount of the difference between the original monthly Subscription Charge and the new monthly Subscription Charge for the remainder of the original minimum-commitment period. For clarity, if a terminal was activated on January 1st, 2015 on the Bronze 3 - 95% - 12-month commitment, and a downgrade was processed on December 1st, 2015 on the Bronze 1 - 95% - 12-month commitment, a one-time charge will be generated for the difference in the monthly Subscription Charge for one (1) month (as the terminal had a single month remaining in the minimum commitment). Note that a new 12-month minimum commitment will also be applied based upon the new plan (Bronze 1 - 95% - 12-month commitment).
- 9.) Certain minimum-commitment periods have a Grace Period during which the one-time charges for downgrades will be waived . The Grace Periods available as set out in "Term Commitment Grace Period / Fee Adjustments".

10.) There is an option to suspend the subscription for Inmarsat Global Xpress Land plans. Subscription Suspension allows the customer to temporarily place the satellite terminal's service package on hold and pay a reduced fee while Subscription Suspension is in place. Subscription Suspension is intended to assist Subscribers with special operational requirements, including but not limited to long-term maintenance or seasonal lay-up.

11.) Subscription Suspension is available for up to six (6) continuous months. Subscription Suspensions must have a minimum duration of seven (7) calendar days. A Subscription Suspension can only occur once during the minimum-commitment period. Time spent within Subscription Suspension will not count towards minimum commitment. Voice and Data traffic will not be permitted to pass from the system while in Subscription Suspension.

12.) The date of Subscription Suspension will be counted as fully "within suspension". The date of Subscription Resumption will be counted as fully "within subscription". When a Subscription Fee is suspended, the standard Monthly Fee will be pro-rated based upon the date of suspension and the Subscription Suspension Fee will be pro-rated for the remainder of the month. To clarify, if a Suspend Subscription is processed as of the 16th of the month for a 30-day month, then the monthly fee for the 1st half of the month will be 50% of the standard monthly fee, and the monthly fee for the 2nd half of the month will be 50% of the Subscription Suspension monthly fee.

13.) A normal service suspension will not trigger a Subscription Suspension. During a Subscription Suspension period, it is not possible for a SIM to be upgraded, downgraded, suspended or deactivated. 14.) Global Xpress Enterprise / Government Land Packages do not include use of the L-Band satellite network for backup data and voice communications.

Inmarsat Global Xpress Enterprise / Government Land Terms and Conditions

1.) A one-time Subscription Activation charge applies to each Subscription when it is first provisioned on the Inmarsat Network. See "Miscellaneous Charges" for activation charges and other fees. Please see "Terminal Groups" for the antenna size associated with a terminal group. 2.) All Prices reflect a 12-month minimum commitment. For price adjustments for shorter and longer minimum-commitment timeframes, please see "Term Commitment Grace Period / Fee Adjustments".

3.) For commitment purposes, the activation month will count as a full month towards the commitment. If the terminal is disconnected early, an early termination charge will apply. The early termination charge will be the full, outstanding, commitment period. For clarity, if a terminal is activated on January 28th, 2015 on a plan with a 12-month commitment, the terminal will be committed through December 31st, 2015. January 2015 will count as a full month towards the commitment.

4.) Monthly fees will be charged in advance, aside from the initial monthly fee, which will be charged in arrears. Initial monthly fee is pro-rated based upon the number of days active. Global Xpress plans are available on a global or regional basis (defined in "Geographic Regions" section). 5.) Inmarsat Global Xpress plans may be withdrawn (i.e., discontinued) with a closure date. New activations on the discontinued plan will no longer be available after official closure date. Existing terminals on the withdrawn plan may remain on the plan for the remainder of their minimum-commitment period. Once the minimum-commitment period has elapsed, the satellite terminal must be moved to a new plan.

6.) Moving to a package that has a lower monthly fee will be considered a downgrade. Moving to a package that has a greater monthly fee will be considered an upgrade. Note that upgrades and downgrades are identified based upon the Subscription Fee for the same base-term commitment. The move to the same base plan with a lower minimum-commitment period will not be allowed. To clarify, moving from a Bronze 1 - 95% - 3-year commitment to a Bronze 1 - 95% - 6-month commitment will not be allowed.

- 7.) The new monthly Subscription Charge for an upgrade or downgrade will be applied based upon the date of the change (UTC). For clarity, an upgrade processed at 5 PM Eastern on February 21st will be counted as if it has been made at 00:00 UTC February 21st. A new minimum-commitment period will be applied from the date of upgrade.
- 8.) Downgrades will generate a one-time charge, which equals the dollar amount of the difference between the original monthly Subscription Charge and the new monthly Subscription Charge for the remainder of the original minimum-commitment period. For clarity, if a terminal was activated on January 1st, 2015 on the Bronze 3 - 95% - 12-month commitment, and a downgrade was processed on December 1st, 2015 on the Bronze 1 - 95% - 12-month commitment, a one-time charge will be generated for the difference in the monthly Subscription Charge for one (1) month (as the terminal had a single month remaining in the minimum commitment). Note that a new 12-month minimum commitment will also be applied based upon the new plan (Bronze 1 - 95% - 12-month commitment).
- 9.) Certain minimum-commitment periods have a Grace Period during which the one-time charges for downgrades will be waived. The Grace Periods available as set out in "Term Commitment Grace Period / Fee Adjustments".
- 10.) There is an option to suspend the subscription for Inmarsat Global Xpress Land plans. Subscription Suspension allows the customer to temporarily place the satellite terminal's service package on hold and pay a reduced fee while Subscription Suspension is in place. Subscription Suspension is intended to assist Subscribers with special operational requirements, including but not limited to long-term maintenance or seasonal lay-up.
- 11.) Subscription Suspension is available for up to six (6) continuous months. Subscription Suspensions must have a minimum duration of seven (7) calendar days. A Subscription Suspension can only occur once during the minimum-commitment period. Time spent within Subscription Suspension will not count towards minimum commitment. Voice and Data traffic will not be permitted to pass from the system while in Subscription Suspension.
- 12.) The date of Subscription Suspension will be counted as fully "within suspension". The date of Subscription Resumption will be counted as fully "within subscription". When a Subscription Fee is suspended, the standard Monthly Fee will be pro-rated based upon the date of suspension and the Subscription Suspension Fee will be pro-rated for the remainder of the month. To clarify, if a Suspend Subscription is processed as of the 16th of the month for a 30-day month, then the monthly fee for the 1st half of the month will be 50% of the standard monthly fee, and the monthly fee for the 2nd half of the month will be 50% of the Subscription Suspension monthly fee.
- 13.) A normal service suspension will not trigger a Subscription Suspension. During a Subscription Suspension period, it is not possible for a SIM to be upgraded, downgraded, suspended or deactivated. 14.) Global Xpress Enterprise / Government Land Packages do not include use of the L-Band satellite network for backup data and voice communications.
- 15.) A Network Service Device (NSD) is required to support Global Xpress Voice (GX VoIP & FleetBroadband Circuit Switched) and Global Xpress Video Teleconferencing (VTC). Landline termination pricing for VoIP calls placed to international direct-dialed telephone numbers are not defined. Calling zones and per-minute rates will be published at a later stage.

Inmarsat Global Xpress Enterprise / Government Land Terms and Conditions

- 1.) A one-time Subscription Activation charge applies to each Subscription when it is first provisioned on the Inmarsat Network. See "Miscellaneous Charges" for activation charges and other fees. Please see "Terminal Groups" for the antenna size associated with a terminal group. 2.) All Prices reflect a 12-month minimum commitment. For price adjustments for shorter and longer minimum-commitment timeframes, please see "Term Commitment Grace Period / Fee Adjustments".
- 3.) For commitment purposes, the activation month will count as a full month towards the commitment. If the terminal is disconnected early, an early termination charge will apply. The early termination charge will be the full, outstanding, commitment period. For clarity, if a terminal is activated on January 28th, 2015 on a plan with a 12-month commitment, the terminal will be committed through December 31st, 2015. January 2015 will count as a full month towards the commitment.

4.) Monthly fees will be charged in advance, aside from the initial monthly fee, which will be charged in arrears. Initial monthly fee is pro-rated based upon the number of days active. Global Xpress plans are available on a global or regional basis (defined in "Geographic Regions" section). 5.) Inmarsat Global Xpress plans may be withdrawn (i.e., discontinued) with a closure date. New activations on the discontinued plan will no longer be available after official closure date. Existing terminals on the withdrawn plan may remain on the plan for the remainder of their minimum- commitment period. Once the minimum- commitment period has elapsed, the satellite terminal must be moved to a new plan.

6.) Moving to a package that has a lower monthly fee will be considered a downgrade. Moving to a package that has a greater monthly fee will be considered an upgrade. Note that upgrades and downgrades are identified based upon the Subscription Fee for the same base-term commitment. The move to the same base plan with a lower minimum- commitment period will not be allowed. To clarify, moving from a Bronze 1 - 95% - 3-year commitment to a Bronze 1 - 95% - 6-month commitment will not be allowed.

7.) The new monthly Subscription Charge for an upgrade or downgrade will be applied based upon the date of the change (UTC). For clarity, an upgrade processed at 5 PM Eastern on February 21st will be counted as if it has been made at 00:00 UTC February 21st. A new minimum- commitment period will be applied from the date of upgrade.

8.) Downgrades will generate a one-time charge, which equals the dollar amount of the difference between the original monthly Subscription Charge and the new monthly Subscription Charge for the remainder of the original minimum- commitment period. For clarity, if a terminal was activated on January 1st, 2015 on the Bronze 3 - 95% - 12-month commitment, and a downgrade was processed on December 1st, 2015 on the Bronze 1 - 95% - 12-month commitment, a one-time charge will be generated for the difference in the monthly Subscription Charge for one (1) month (as the terminal had a single month remaining in the minimum commitment). Note that a new 12-month minimum commitment will also be applied based upon the new plan (Bronze 1 - 95% - 12-month commitment).

9.) Certain minimum- commitment periods have a Grace Period during which the one-time charges for downgrades will be waived. The Grace Periods available as set out in "Term Commitment Grace Period / Fee Adjustments".

10.) There is an option to suspend the subscription for Inmarsat Global Xpress Land plans. Subscription Suspension allows the customer to temporarily place the satellite terminal's service package on hold and pay a reduced fee while Subscription Suspension is in place. Subscription Suspension is intended to assist Subscribers with special operational requirements, including but not limited to long-term maintenance or seasonal lay-up.

11.) Subscription Suspension is available for up to six (6) continuous months. Subscription Suspensions must have a minimum duration of seven (7) calendar days. A Subscription Suspension can only occur once during the minimum- commitment period. Time spent within Subscription Suspension will not count towards minimum commitment. Voice and Data traffic will not be permitted to pass from the system while in Subscription Suspension.

12.) The date of Subscription Suspension will be counted as fully "within suspension". The date of Subscription Resumption will be counted as fully "within subscription". When a Subscription Fee is suspended, the standard Monthly Fee will be pro-rated based upon the date of suspension and the Subscription Suspension Fee will be pro-rated for the remainder of the month. To clarify, if a Suspend Subscription is processed as of the 16th of the month for a 30-day month, then the monthly fee for the 1st half of the month will be 50% of the standard monthly fee, and the monthly fee for the 2nd half of the month will be 50% of the Subscription Suspension monthly fee.

13.) A normal service suspension will not trigger a Subscription Suspension. During a Subscription Suspension period, it is not possible for a SIM to be upgraded, downgraded, suspended or deactivated. 14.) Global Xpress Enterprise / Government Land Packages do not include use of the L-Band satellite network for backup data and voice communications.

15.) A Network Service Device (NSD) is required to support Global Xpress Voice (GX VoIP & FleetBroadband Circuit Switched) and Global Xpress Video Teleconferencing (VTC). Landline termination pricing for VoIP calls placed to international direct-dialed telephone numbers are not defined. Calling zones and per-minute rates will be published at a later stage.

1.) This map is an indicative illustration of the Global Xpress Ka-band coverage for all Global Plans. 1.) This map is an indicative illustration of the Global Xpress Ka-band coverage for each separate Geographic / Regional Coverage area. 2.) Actual coverage may vary and is dependent on various conditions including elevation and proximity to the edge of the beam.

Inmarsat Global Xpress Enterprise / Government Land - Geographic / Regional Coverage Countries:

- **Europe** consists of:
All 28 countries of the European Union (as of October 2014), and in addition Albania, Bosnia & Herzegovina, Greenland, Iceland, Kosovo, Macedonia, Montenegro, Norway, Serbia, Switzerland and Turkey.
 - **Russia and CIS** region consists of:
