Service activation

One-time charge \$200.00

Features

- Seamless integration with all KVH TracPhone mini-VSAT Broadband antennas
- Iridium's highest L-Band data speeds (704/176 Kbps down/up) with capability to increase speeds to
- Least-cost routing capability that enables onboard data to switch from mini-VSAT Broadband service to Iridium Certus and back again as necessary
- Two Iridium voice connections that are always available
- Additional remote support capabilities for TracPhone mini-VSAT Broadband antennas worldwide

Terms and conditions

*The Certus equipment must be purchased from Global Satellite as a KVH Tracphone back-up.

All prices are in \$USD and do not include any taxes or fees that may apply.

- Available as a backup to mini-VSAT Broadband service ONLY. A backup may only be used when the primary KVH VSAT terminal is inoperable or out of coverage for brief periods (i.e., not for extended operations in or regular transits of known areas in which KVH VSAT service does not have coverage).

- Subscription term must match term of mini-VSAT Broadband service contract.

If mini-VSAT Broadband service is suspended, backup Iridium service is not permitted to be used. However, per Iridium policy, suspension is not allowed.

Options may exist to minimize charges during suspension periods. Contact us for clarification

Subscriber acknowledges and agrees that Global is authorized to temporarily limit the transfer rate at which Subscriber can send and receive data if Subscriber's data use is excessive.

- Calls to other satellite networks are \$18/minute.

- Incoming calls are not charged to the vessel.

- In order to operate within Russia, Iridium devices must be registered with Iridium's Russian affiliate (Iridium Communications OOO). Users may register their Iridium SIM card at www.iridium-russia.com.
