

TracVision® TV1

Maritime Satellite TV Antenna System

Choose an ultra-compact satellite TV antenna to bring live news, weather, and sports programming to any vessel

It's never been easier to have top TV performance on military vessels

KVH's ultra-compact TracVision TV1 satellite TV antenna system provides vessels with high-quality satellite television coverage and excellent signal gain, whether the vessel is in port or patrolling the coast.

With TV1 onboard, the crew can enjoy the programming that helps keep morale high during off-duty hours at sea. TracVision TV1's single cable design means it's easy to install, making it a great choice for new installations or retrofits. Plus, TV1 is HDTV-compatible with Ku-band satellite TV services.

TV-Hub integrates all functionality

The streamlined TracVision TV-Hub is an innovative solution to the belowdecks unit. An IP-enabled antenna control unit with Ethernet connection and a built-in Wi-Fi interface, the TV-Hub enables access to system information from any mobile device or computer. The TV-Hub also enables automatic satellite switching, which makes it easy to access all programming and local channels anywhere the vessel travels. Built-in SWM-compatible technology supports DIRECTV programming, built-in DISH Pro output supports DISH Network and Bell TV service, and built-in DiSEqC protocol supports select linear TV services in Europe.

Built-in extras

With the TracVision TV-Hub, status indicators quickly convey information about antenna function and power. An added convenience is that the TV-Hub provides power to the antenna. In addition, its NMEA input for heading and GPS enables fast satellite acquisition. The TV-Hub's two output ports provide the flexibility to use legacy receivers.

The TracVision TV-Hub is a streamlined IP-enabled belowdecks unit that makes the TV1 extremely easy to use

Features & Benefits

- Ultra-compact 32 cm (12.5 inch) antenna
- Supports DIRECTV®, DISH Network®, DISH HD, and Bell TV throughout North America, and select linear Ku-band services in Europe
- HDTV-compatible (Ku-band services only)
- Single coaxial cable for power, data, and video for easy installations and retrofits
- Proprietary RingFire™ technology for stronger signals, wider geographic coverage, and better reception
- DVB®-S2 compatible
- Global support from KVH's Certified Support Network (CSN)

Technology in hand

The all-new TracVision TV-Hub brings unparalleled ease to every aspect of controlling your TracVision TV1 with a state-of-the-art web interface designed for optimal viewing on any smartphone, tablet, smart TV, or computer:

- Wizard for easy installation and setup
- Fast troubleshooting with antenna status and advanced system diagnostics
- Future-proof design with remote software and satellite library update feature
- Fast setup for integrating with an onboard network
- Advanced automatic or manual satellite switching capabilities with one touch
- Extensive built-in worldwide satellite library
- IP AutoSwitch option for multiple receiver installations. When used in North America with a DiSEqC-compatible satellite receiver (DISH Network and Bell TV), IP AutoSwitch provides simple, automatic switching between satellites using the master receiver's remote control.

TV-Hub user interface provides system control from any mobile device or computer.

TracVision TV1 Specifications

| | |
|---|--|
| Satellite Coverage Regions ² | North America & Europe ^{3 & 4} |
| Antenna Dish Diameter | 32 cm (12.5") |
| Antenna Unit Diameter x Height | 34.3 cm x 33.7 cm (13.5" x 13.3") |
| Antenna Unit Weight | 3.6 kg (8 lbs) |
| Minimum EIRP (Ku-band) ⁵ | 51 dBW |
| LNB Types Available (polarization/output) | Linear Universal Single ⁶ Circular |
| Tracking Technology | High performance |
| User Interface | TV-Hub web interface |
| System Power | 10-30 VDC 42 watts nominal |
| Warranty ⁷ | 2-year parts, 1-year labor |

¹ Services may require different LNB types.

² For details, visit www.kvh.com/footprint.

³ Limited coverage in certain regions in N. America & Europe; see www.kvh.com/footprint for details.

⁴ Requires region-specific receiver and service. Receiver not included.

⁵ Minimum EIRP values are average approximate figures that may vary according to actual transponder frequency and location.

⁶ Single receiver system.

⁷ Unless subject to in-country regulations.

TracVision TV1 coverage

Choose TV1 for coverage in select areas in North America and Europe, with support for DIRECTV, DISH Network, Bell TV, and select European linear Ku-band services.¹ For details, visit kvh.com/footprint.

Solid warranty & technical support

Wherever your vessel travels, you will receive outstanding support and service through KVH's certified quality, product, and customer support programs. This support includes KVH's 24/7 online web support system; a responsive international KVH support team; an extensive network of authorized dealers around the globe; the exclusive KVH Certified Support Network (CSN); and a standard 2-year parts/1-year labor warranty.⁷

Add a TracPhone® VIP-series system as your SATCOM solution

KVH has sold and fielded more than 175,000 mobile satellite antennas worldwide. Rely on KVH as your single source for all of your maritime needs, including global communications via KVH's industry-leading mini-VSAT Broadbandsm service and TracPhone VIP-series systems.
