

Internet on Demand

Shared Bandwidth For Great Service At A Great Price

Get the most competitive rates on internet airtime with International Ocean Networks 8:1 package. Get access to ION's solid internet network at sea at incredible prices.

8:1	8:1 Services per Month	*Annual	*Month to Month	*6 Month
	128kbps Upload x 512kbps Download	\$1,567.00	\$1,905.00	\$1,700.00
	256kbps Upload x 1024kbps Download	\$3,135.00	\$3,810.00	\$3,400.00
	256kbps Upload x 2048kbps Download	\$4,500.00	\$5,545.00	\$4,950.00
	256kbps Upload x 3072kbps Download	\$5,500.00	\$6,720.00	\$6,000.00

512kbps Upgrades can be added on to any 8:1 service for only \$900.00 per month

Dedicated Bandwidth And Exceptional Speed

Guarantee your yacht the most reliable and fast internet. The ION 1:1 package ensures constant access to the fastest internet broadband at sea. Keep your crew and passengers connected and never go wanting for extra bandwidth.

1:1	1:1 Services per month	Annual Contract	Month to Month
	256kbps Upload x 1024kbps Download	\$12,400.00	\$13,700.00
	256kbps Upload x 1536kbps Download	\$16,900.00	\$18,900.00
	256kbps Upload x 2048kbps Download	\$23,500.00	\$25,400.00

Fast and reliable internet at sea

We at Global are now able to offer all our customers, who in the past were relying on our flexible monthly service, a tailored annual package that tops it all. Not just does it include the competitive prices you are used to from our month to month contracts, it also gives you reduced rates for a year period, options for weekly *up-/downgrades and saves you the hassle of watching your monthly billing.

Contented Vs. Dedicated

Select the 8:1 package for cheaper rates and a shared bandwidth connection with other yachts.

Select the 1:1 package for a guaranteed broadband allocation.

How Contention Allocation Works

To better understand the effect of contention ratios on your service just divide the maximum stated kbps by the contention ratio. Eg: 1024kbps download with a 10:1 contention ratio can be resolved by: $1024/10 = 102.4$ kbps

The above equation shows that if all ten users attempted to maximize the bandwidth at exactly the same time each yacht would receive a download speed of 102.4kbps. This figure by default dictates the CIR, committed information rate. CIR is the absolute minimum download speed you will ever receive.

Charges for and operates a contention ratio of 8:1 when at full capacity. At the same time we do our best to prevent running at full capacity by adding masses of satellite bandwidth every single year. We aim to provide services of 5:1 most of the time or even 2:1 during the quiet times of the season.

The 1:1 services are simply not shared with any other yachts so the maximum bandwidth will be available to you 100% of the time.
